

Set up in 1961, the **Centre Antoine-Lacassagne** is located in the heart of Nice, near the **CHU** (Teaching Hospital) that it's closely related with. The Centre Antoine-Lacassagne has state of the art facilities, in particular the Biomedical Cyclotron (Proton Therapy) and the Cyber Knife.

The **CAL** project is based on two main priorities: The highest quality and technical standards for healthcare, and a total and permanent respect of the patient. The project is strategically structured for adult treatment management.

The Medical Oncology Department (Chemotherapy) is specialized in the treatment of all types of cancer and tumours in both adults and children.

Surgical activity focus on:

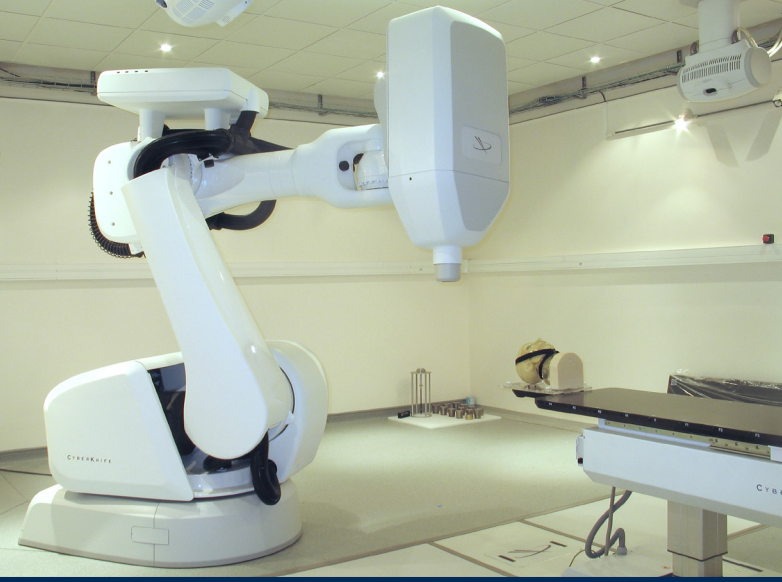

-  Breast
-  Gynecology
-  ENT, Head and Neck cancers
-  For other organs, there is coordination between our center and the teaching hospital teams to comply with the joint medical oncology project.

Main Cancer Therapeutics:

-  Radiotherapy
-  Conventional Radiotherapy
-  Brachytherapy
-  Protontherapy: For treating tumors of the eye and in particular Melanomas.
-  Contact Radiotherapy (Small superficial and accessible tumors, Small rectal cancers, Small cancers of the skin and eyelids.)
-  CyberKnife Radiotherapy (Pulmonary tumors, certain nervous system tumors and spinal tumors)

Surgery and Medical Cancer Treatment

-  Chemotherapy, Targeted Treatments, Immunotherapy, Hormonotherapy.

In most cases, these treatments will be performed either simultaneously or concomitantly.

-  Breast Cancer
-  Gynecological Cancer
-  Hematological Cancer (Leukemia and Lymphoma)
-  Neurological Cancer
-  Lung Cancer
-  Prostate Cancer
-  Renal Cancer
-  ENT - Head and Neck Cancer and Salivary Gland Cancers
-  Thyroid Cancer
-  Eye Cancer
-  Sarcoma: Bone and soft tissue Cancer
-  Gastroenterological Cancer
-  Male Genital Cancer
-  Skin Cancer

### BREAST & GYNECOLOGY CLINIQUE

The Breast Clinic performs activities of diagnostic, screening and the care of breast disease management.

The main objective is to bring all disciplines together on one site in an outpatient facility. We specialize in a rapid management of the disease and we remain the first women's cancer in France and Europe to treat each case individually defining the best strategy for treatment or monitoring.

We are also a multidisciplinary unit offering medical consultations and care provision in Oncological Surgery, Plastic Surgery, Medical Oncology, Radiation Therapy, Algology and Oncogenetics.

The facility includes: An imaging unit of Breast Diagnostic and Interventional, Mammography, Angiography Mammography, Ultrasound, CT, MRI, Nuclear Medicine (Sentinel Node)

Consultations for paramedical professionals: Nurses, Announcement Dermograph and Beautician, Nutritionist, Psychologist etc.

The Breast Clinic is organized to improve and simplify the services provided to patients and families and supporting patients in all stages of their disease with the development and monitoring of their individualized care plan.

CONVENTIONAL HOSPITALISATION UNIT OF 35 BEDS

### The Reception House "La Consolata"

The key strength of the center is based on the high quality of care provided for patients. The Centre Antoine Lacassagne has its own hosting structure House "La Consolata" founded by the Augustinian Sisters, located on the hills of Nice, just minutes from West (Cyberknife, Proton Therapy) in a setting that is both quiet and relaxing, enjoying a panoramic view of the Bay of Angels.

### The International Department

To ensure that patients receive the best possible care, an International Unit has been set up to provide you with any information you require concerning your hospital stay. Multiple languages are spoken in this department where we welcome patients from around the world.
