

Gustave Roussy is the First European Cancer Centre with all types of cancer being treated.

The impressive facility is a centre of excellence for Patient Care, Research and Teaching.

Gustave Roussy is a source of innovations in treatment and advances in diagnostic techniques it looks to place innovation at the heart of a human, scientific and technological revolution in the fight against cancer.

High technology medicine in the service of mankind

The Institute has expertise in the management of rare cancers and complex tumours. It treats all cancers at every stage of life. It offers its patients individualized care combining innovation and a humane approach. The treatment is important but so is quality of life, physical, psychological and social.

Gustave Roussy is recognised as a hospital for the specialist referral of complex cases and rare tumours. It can bring to bear skills in medical oncology, chemotherapy, radiotherapy, surgery, interventional radiology and reconstructive surgery.

The Department of Childhood and Adolescent Oncology

In 1950, Gustave Roussy established the first department of Pediatric Oncology in France. The department is led by Dr Dominique Valteau-Couanet and treats all types of Pediatric Cancer: Neuroblastomas, Cerebral Tumours, Tumours of Bone and Soft Tissue, Lymphomas, Germinal Tumours and Rare Tumours. Each doctor in the department is an expert on the National, European and International stage.

The International Department:

To ensure that patients receive the best possible care, an International Unit has been set up to provide you with any information you require concerning your hospital stay. Multiple languages are spoken in this department where we welcome patients from all around the world.
