

MONACO CARDIO-THORACIC CENTER

The Monaco Cardio-Thoracic Center was founded in 1987. The principality of Monaco and Nice Cote d'Azur are at the heart of Mediterranean Europe.

Nice Cote d'Azur airport is only 10 minutes away using the regular helicopter shuttle service or 30 minutes by car.

The Center represents an innovative concept where several world renowned medico-surgical teams can provide the finest care to patients 24 hours a day, every day of the year.

Adults and children suffering from cardiothoracic and vascular disorders, including emergencies and the most severe cases, such as neonatal emergencies or terminal heart failure can benefit from the most cutting edge techniques at the Monaco Cardio-Thoracic Center

The CCM groups together a permanent medical and surgical team made up of qualified consultants in diagnostic and interventional cardiology, anesthetists and thoracic and cardiovascular surgeons, all experts in their field.

The CCM provides each patient with the services of a team boasting extensive experience and expertise enabling them to offer medical and surgical treatment for all thoracic and cardiovascular diseases in both children and adults.

The technical facilities and specificities available at the CCM enable us to provide a tailored response to a broad spectrum of situations and a holistic approach to patient care.

#### ADULT CARDIOLOGY PATIENTS

The Center provides complete medico surgical treatment for all thoracic and cardiovascular disorders including:

-  Congenital Heart Disease
-  Acquired Cardiac Disorders
-  Coronary Disease
-  Valvulopathy
-  Heart Failure
-  Cardiac Arrhythmia
-  Vascular and Intrathoracic Disorders

## HEART FAILURE CENTER

The center is specialized in the treatment of heart failure after Myocardial Infarction, The permanent staff originated the technique of left ventricular reconstruction, which, in conjunction with drug therapy, makes it possible to avoid or postpone a heart transplant, previously the only long-term solution for patients with recalcitrant heart failure.

## PEDIATRIC CARDIOLOGY

The department, in conjunction with the Obstetrics Department at the Princess Grace Hospital and the children's hospital of Nice (Hopitaux pediatriques de Nice CHU-Lenval) is open to pregnant women and children of all ages with congenital Heart Disease for :

- ✚ Prenatal ultrasound diagnosis
- ✚ Treatment of neonates with severe heart disease revealed at birth
- ✚ Treatment of older children

SURGICAL TREATMENT OF THE MOST COMPLEX CASES is performed by WORLD-RENOUNDED SPECIALISTS

## The International Department:

A large number of foreign patients from 45 different countries come to the hospital for treatment every year. To ensure that patient receives the best possible care, an International Unit has been set up to provide you with any information you require concerning your hospital stay. Multiple languages are spoken in this department where we welcome patients from around the world.
