

The Foundation Rothschild was founded over a century ago in the heart of Paris, and has been developing expertise in the treatment of eye and brain conditions.

The Foundation Rothschild Hospital has always been and still remains a National and International reference for Head and Neck diseases, thanks to the development of a multidisciplinary approach to patient care combined with sustained investment in new therapies and technological innovations.

The Ophthalmology Foundation Rothschild Hospital is systematically ranked in the top ten of the best hospitals in France on its specialties.

A world class healthcare facility with a focused on "head and neck" disorders in adults and children.

The Ophthalmology

The **Ophthalmology** Foundation Rothschild Hospital has been a benchmark Institution for Eye Disorders for over a century.

Its teams of experts, working in a department comprised of six services, cover all ophthalmology specialties from detection through to the surgical treatment of the most complex cases: Cataracts, Refractive Surgery, Glaucoma, Corneal or Conjunctiva Diseases, Diseases of the Retina, Eyelids, Tear Ducts and Eye Orbit, Strabismus, Eye Inflammation and Infections.

Further specialties are housed here with Pediatric Ophthalmology starting at birth and Neuro-Ophthalmology.

The Ophthalmology Foundation Hospital is regularly ranked among the top 3 Ophthalmology Centers in France.

The Neurosciences

*Adult Neurosurgery

The Department of **Adult Neurosurgery** treats all patients presenting a Neurosurgical condition. It specializes in the fields of:

Skull Base Tumor Surgery: Meningioma, Neuromas, Adenomas, and Pituitary Tumors; Orbital Tumor Surgery in collaboration with Department of Eye and Eyelid Surgery.

Spinal Surgery, in particular for Degenerative Disorder Tumors and Malformations.

Chronic Pain Surgery, within the Centre for Pain Assessment and Treatment.

Surgery for Parkinson's Disease.

Pediatric Neurosurgery

The department of **Pediatric Neurosurgery** deals with all common disorders in children.

The Department of Pediatric Neurosurgery is particularly renowned for the assessment and surgical treatment of Recalcitrant Epilepsy in infants and children.

Interventional Neuroradiology

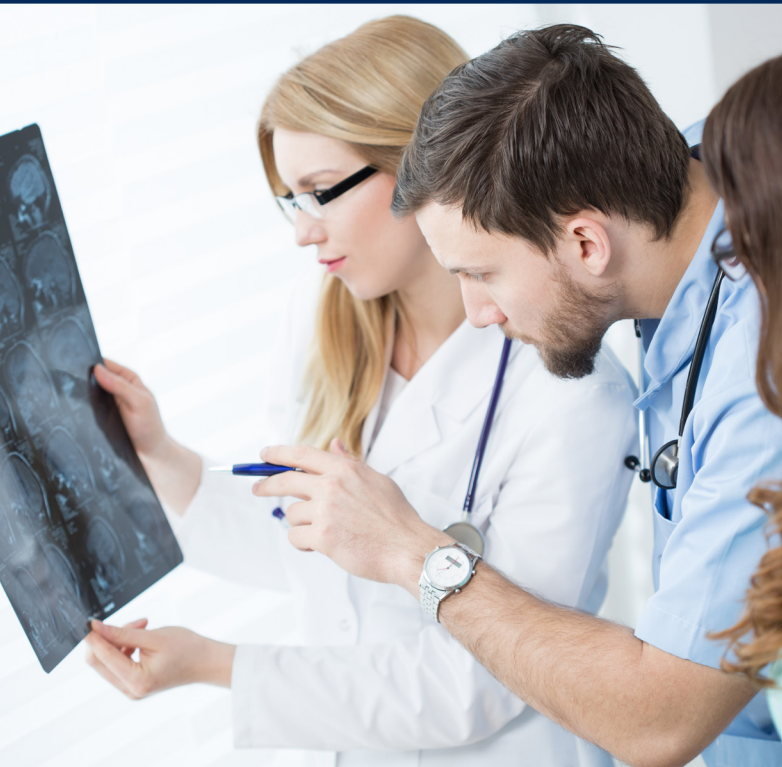

The Department of **Interventional Neuroradiology (INR)** at the Foundation Rothschild Hospital specializes in the treatment of Vascular Malformation of the brain or spinal cord and strokes in the acute phase. The departments quality and technical facilities make it a world leader, for both adults and pediatric care.

Neurology

The **Neurology** department treats all Central and Peripheral Nervous system disorders.

The main activities of the department relate to Inflammatory Diseases of the nervous system, in particular Multiple Sclerosis.

The department also has a specialist unit for the treatment of Parkinsons Disease, a "Memory Evaluation" unit and a Neurovascular unit that also focuses on Neurological Visual Disorders.

The International Department:

A large number of foreign patients from 45 different countries come to the hospital for treatment every year. To ensure that patients receive the best possible care, an International Unit has been set up to provide you with any information you require concerning your hospital stay. Multiple languages are spoken in this department where we welcome patients from around the world.
